Example Oil Lease SPCC Plan.doc  
Tier I and Tier II facilities.pdf  
SPCC Qualified Facilities Fact Sheet.pdf  
2012\_12\_Onshore Production Checklist\_FINAL.pdf

Deke:

Sorry for the delay in getting back to you.

I'm forwarding you the information I promised you.

Attached is an example SPCC plan for an oil lease site for you to review so you have an idea of what is required.

A couple of fact sheets for Tier I and Tier II facilities for your info. The Hastert leases do not qualify but I told you I'd send some info explaining what the Tiers refer to.

The last file is the checklist EPA will complete when we review the plan(s) and conduct the onsite inspection. This is provided so you can check your plan before sending it in and be sure it adequately addresses the required plan elements.

You will be receiving a Notice of Federal Interest letter, informing you that EPA is prepared to take action to address the releases at the Hastert Lease(s) if D&Z Exploration fails to follow through with performing the work outlined by the KCC.

Any questions let me know.

Mr. Doherty,

This is Deke Belden with D&Z Exploration, we just spoke about our plans for the Hastert Leases in Anderson County, KS. We purchased and took over management of the properties on April 1, 2015.

Shortly after that we met with the landowner, Nathan Lange, and officials from the KCC to address the spill/mess concerns left over from the previous operator and containment. We told Nathan and KCC that we would stop the discharges that had been occurring under the previous owner/operator, and since then we have done that. There are still exiting mess areas from past leaks, but as weather has permitted (it has been an unseasonably wet period since we took the properties over) we have been continuing to clean up messes. We are addressing the issue of containment by building new and adequate earth berms around both Hastert Batteries and the Cartwright tank battery. That work should be completed by tomorrow or early next week. We are finishing SPCC paperwork for the newly acquired properties and should have them available for you next week. Per our discussion, I am meeting with KCC officials and Nathan next week to regroup, reassess and plan, in regards to what we have done so far, and what we will be doing in the near future to address all concerns. I will notify you when that meeting is so that you can be present as well. After I have met once again with the KCC and Nathan, I will email you a summary of that meeting so you are also aware of the current status and the specific plans moving forward. In the meantime or thereafter, please contact me with any new information or guidance that could help this situation. Thank you for the call, it was productive, and I will be in contact with you moving forward.

Deke Belden
